

I DO NOT SUPPORT RM-10781. No amateur radio operator should support this regressive petition to the FCC. There is very little in this document that supports Technician class operators. It is not in full accordance with the changes that are occuring around the world in amateur radio. If the ARRL wants to have three or more classes of operator based upon a written exination, then I suppose they will probably have there way with the FCC, regardless of what the majority of non-members, and the ham and world community wants. Give more frequency availability to these groups, but DO NOT PROHIBIT THE USE OF EACH AVAILABLE BAND FOR PROPERLY LICSENSED OPERATORS! In addition, no MODE RESTRICTIONS SHOULD EVER BE APPLIED TO ANY CLASS OF OPERATOR! Terrence Glass,
NOYXE
